

Seminar 7

14/11/2023

General
Responsibility
Assignment
Software
Patterns / Principles

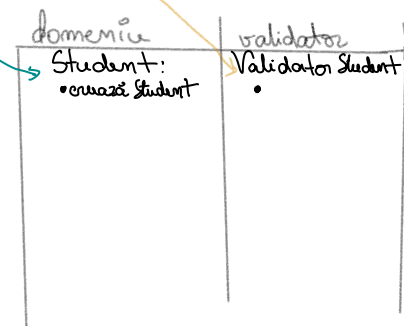

= principii generale de alocare a responsabilității software
→ single responsibility principle

ex: gestionează notele studenților

- information expert
- principal creator
- protected variations: protected from changes in the domain
- pure fabrication

fabricare = creare + validare

fiecare obiect va avea : un service

→ un validator
→ un repo
→ un domeniu

→ Low coupling = "cât mai puține dependente"
